The Company

The Company Gourmet Cheese (Aust) Pty Ltd ("GCA") has been supplying the Australian market with quality fruit and savoury cream cheeses in one form or the other for over 15 years.

The company has established itself as the main supplier of fruit & cream cheese in the major supermarket chains in Australia.

The company is continuously re-engineering the way its cheeses are being presented in a way that will allow the consumer more choice in the market place.

It has developed two new packaging alternatives in the 100gms pack and the very popular twin/variety pack. It is the first time that fruit and savoury cream cheeses have been packaged in this innovative way. The twin variety pack, will allow the consumer a choice between a fruit and a savoury cheese with the ability to eat one and keep one fresh.

Gourmet Cheese (Aust) Pty Ltd prides itself on its quality product. With no added preservatives and the company's own way of processing fruit/savoury flavours with cream cheese makes the product very very unique in the market place.

Many other companies have attempted to copy our product. In fact they copy most things we do.

So, in our opinion, if you want the best forget the rest and give us a call
